Metal One's Basic Environmental Management Policy

Basic philosophy

Metal One has designated responding to global environmental issues as a priority management task. Based on an awareness of the "global citizen" that we extol in our corporate philosophy, we strive to protect the global environment in all aspects of our corporate activities while seeking sustainable growth.

Basic Policy

1. Compliance with environmental laws and regulations

We will comply with national and local environmental laws and regulations in our corporate activities, as well as requirements from third parties that we recognize and agree to.

2. Consideration for the natural environment

We acknowledge the various environmental effects our corporate activities generate and strive to protect the natural environment.
- Promoting environmentally friendly businesses
- Making environment-related improvements at our business investment affiliates

3. Contributing to a recycling-oriented society

We promote resource and energy conservation in our corporate activities—as well as reuse and recycling—as a way to prevent global warming and help create a sustainable recycling-oriented society.
- Fostering energy and resource conservation efforts
- Reducing greenhouse gas emissions

4. Social service efforts

We contribute to society through efforts linked to environmental improvements and raising environmental awareness.
- Environmental volunteering activities

5. Continuously improving environmental management systems

We continuously improve our environmental management systems to boost our environmental performance.

6. Training and public disclosure

We train all our executives and employees to ensure that they have a deep awareness of global environmental issues and bear the environment in mind as they carry out their corporate activities as "global citizens." We also inform them about our Metal One Group Environmental Charter and basic environmental management policy, and release related information to the public.
