Business Alliance with Clean Energy Systems, Inc.

Metal One Corporation (headquartered in Tokyo Japan; President: Ko Imamura) has agreed with Clean Energy Systems, Inc. (headquartered in California, USA) on the business alliance for decarbonization.

Clean Energy Systems, Inc. (CES) is an engineering company for decarbonization based in the United States. Their proprietary oxygen combustion technology can utilize gas emitted from steel manufacturing plants, etc. including high-CO2 content fuels as energy. Metal One agreed with them on the business alliance including the expansion of CES' technology into the steel industry.

Through our global network, Metal One will contribute to the accomplishment of carbon neutrality in various industries by utilizing CES' technology for decarbonization of the global steel industry.
